DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by SIMON (4,425,908).

As to claims 13-14, SIMON (Fig. 1-5) discloses pusher wire 80 having a free end, a cross section area of reduced sized as a hinge and an end section between the free end and the hinge.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over SIMON (4,425,908) in view of CHEVILLON et al (5,853,420).

As to claims 16-18, SIMON discloses substantially all structural limitations as recited in the claim, except for the enlarged spline secured to pusher wire 80.

Art Unit: 3731

However, CHEVILLON (Fig. 2-3) discloses splines/grooves 25 for receiving filter wires during deployment so as to keep the filter wires in place during deployment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make enlarged spline/grooves secured to pusher wire 80 as claimed so as to keep SIMON filters arms 22 in place during deployment.

Allowable Subject Matter

Claims 15 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
